64 out of 100

*Percentiles for the score will be soon provided.

Problem Statement 1

Find if two strings are cyclic representations of each other.
For e.g. "abc", "cab" are cyclic representations but "abc", "cba" are not.

Input: Two strings x, y.

Output: An integer, 1 if the two strings are cyclic representations, -1 if they are not.

Note: A more detailed problem statement is shown to the candidates.

"Learning is not confined to the four walls of a classroom. True education happens when students step into the real world, exploring industries and witnessing firsthand the marvels of human innovation."

GNIOT Institute of Professional Studies organized an Industrial visit to Mother Dairy for the students of the BBA course on 17th May 2023.

The visit was not only educational but also an eye-opener about the efforts made by Mother Dairy to promote sustainable practices and support local farmers. It was heartening to see their commitment to ethical sourcing and community development initiatives.

We would like to express our gratitude to the Mother Dairy team for organizing this enriching experience for our BBA students. The visit has undoubtedly broadened students' understanding of the dairy industry and its significance in our daily lives.

The students were able to get a wealth of information about the dairy industry, emphasizing the importance of quality control and hygiene.
